CALM CLUB

Places are still available for Calm Club which runs on a Monday

Non-uniform day for Norfolk Day of Welcome Friday 13th June Suggested donations of £1.

A DAY OF WELCOME

We will be celebrating **Norfolk's long history of offering refuge to people seeking safety.** We are so proud of our history of compassion and inclusion, stretching back to those who welcomed the Huguenots in the 16th century. It is even the reason for our Norwich canary!

In addition to this, we are collecting donations of men's footwear and trousers. These can be donated to the school from Monday 2nd June. Thank you for helping us continue orfolk's tradition of welcome.

Any kind donations of items for the Tombola stall at the Clover Hill Summer Fayre would be appreciated, thank you.

Please take to the school office.

Glass Jar donations needed!

We are looking for donations of clean, empty glass jars (with lids) for our Summer Fayre stall – any size welcome!

If you're able to fill them with **sweets, or small craft items,** that would be greatly appreciated. These jars will be used for a fun and popular fundraising game.

Please drop donations off at the school office. Thank you for your support – every little bit helps to make our event a success!

It’s scoliosis awareness month

Scoliosis Support & Research

The A B C D Of Scoliosis

Scoliosis is the abnormal twisting and curvature of the spine and can affect people of any age, from babies to adults. Early detection is key, and that’s where the ABCD of scoliosis comes in.

A Asymmetry in the Back or Waist

Check for scoliosis by spotting unevenness: Are the shoulders or waist uneven? Does one rib cage or side fold more than the other?

Asymmetry is a key sign and takes just a moment to check.

B Bend Forward

The Adam’s Forward Bend Test is a quick way to check for spinal issues.

Ensure the back is uncovered. Have the person bend forward with straight legs and arms, hands between knees if possible. Check for rib bulges or unevenness in the spine or shoulders

C Check for Curve

When scoliosis is present, the spine curves sideways or forward in some cases, creating a C or S shape in some cases.

If you spot a curve during the Bend Forward test or notice asymmetry, it’s important to consult a healthcare professional.

D Diagnosis by X-ray

A formal diagnosis is made by a scoliosis specialist using an X-ray to determine the type and severity of the curve.

Early diagnosis means early intervention which can make a significant difference.
